PUBLICATION OF 3Q20 RESULTS

CEMIG REPORTS EBITDA OF R\$ 1.42 BILLION ADJUSTED EBITDA R\$ 1.33 BILLION (+24.3% x 3Q19)

Highlights of 3Q20:

- Signs of recovery in the economy are reflected in adjusted Ebitda 41% higher than in 2Q20
- Cemig D distributed 1.4% more energy in 3Q20 than in 3Q19
 - Captive market: 3.6% lower
 - Transport for clients: 7.8% higher
- Reversal of R\$ 231 million in allowance for doubtful receivables from Minas Gerais State
- PMSO: 4.7% lower than in 3Q19 (excludes profit shares)
- Cemig D: Opex lower than the regulatory limit for the first time (R\$ 127 million below)
- Bonds: Negative item of R\$ 244 million in Net financial revenue (expenses)
- Restatement of asset held for sale (Light):
 Negative effect of R\$ 136 million = R\$ 90 million net of tax effects
- DEC outage indicator: Below 10; 9.32 in last 12 months
- Fitch and Moody's increase Cemig's ratings; S&P upgrades outlook to Positive
- Solid cash position: R\$ 5.5 billion

Indicators (GWh)	3Q20	3Q19	Change, %
Electricity sold (excluding CCEE)	12,994	13,856	-6.2%
Total energy carried	5,278	4,896	7.8%
Indicators – R\$ million	3Q20	3Q19	Change, %
Sales on CCEE	59.1	9.8	503.1%

3Q20 Results

In thousands of Reais, unless otherwise stated.

For the third quarter of 2020 (**3Q20**) Cemig reports net profit of R\$ 545,376, which compares to a net loss of R\$ 281,834 in 3Q19.

Leading factors in the 3Q20 result:

- Cemig GT's EBITDA of 538,702 in 3Q20, still influenced by the pandemic, shows strong growth in relation to the adjusted EBITDA in 2Q20, but with indications that the most critical moment has passed.
- Cemig GT posted an expense of R\$ 244,399 in Net financial revenues (expenses), related to the debt in Eurobonds and the related hedge instrument. In 3Q19 the combined effect of the debt and the hedge on Net financial revenue (expenses) was R\$ 12,464 negative.
- Reversal in 3Q20 of R\$ 230,935 in the provision for amounts owed by the Direct and Indirect Administration of Minas Gerais State for power consumption and services, due to the State tax authority's acceptance of Cemig's proposal to offset the amount against ICMS tax balances due to the State.
- The investment in Light was recognized at market value on September 30, 2020. This restatement had a negative effect of R\$ 136,244 in 3Q20, corresponding to a net amount after tax effects of R\$ 89,921.
- Lower PMSO costs: down 4.7% year-on-year (YoY) excluding profit shares –which were higher, reflecting the profit in 3Q20, compared to a reversal in profit shares in 3Q19, due to the loss in that quarter.
- Gain in 3Q19 of R\$ 309,144 R\$ 204,067 net of tax effects from disposal of shares in Light, and re-measurement of the remaining holding.
- Recognition in 3Q19 of a tax contingency in a total amount of R\$ 862.313, for legal actions arguing the applicability of Social Security contributions to payments of profit shares.

Consolidated operational revenue

Revenue from supply of electricity:

Total revenue from supply of electricity was R\$ 6,692,911 in 3Q20, 2.65% less than in 3Q19 (R\$ 6,875,079).

(1) The calculation of the average price does not include revenue from supply not yet billed.

(2) Information in MWh has not been reviewed by external auditors.

(3) Includes Regulated Market Electricity Sale Contracts (CCEARs) and 'bilateral contracts' with other agents.

Final consumers

Revenue from energy sold to final consumers in 3Q20 was R\$ 5,785,202, compared to R\$ 6,147,869 in 3Q19: 5.90% lower YoY.

This was due in particular to consumption by *industrial* clients 17.36% lower, and by *commercial* clients 15.40% lower, due to the Covid pandemic – partly offset by *residential* consumption 3.68% higher, and *rural* consumption 8.04% higher.

Revenue from Use of the Distribution System (the TUSD charge)

This is revenue from charging Free Consumers the Tariff for Use of the Distribution System (TUSD) on the volume of energy distributed. In 3Q20 this revenue was R\$ 793,698, or 11.6% more than in 3Q19 (R\$ 711,185). The higher revenue mainly reflects the Company's annual tariff adjustment in effect from June 1, 2019, which for Free Clients resulted in an increase of approximately 10.16% (effect up to August 18, 2020). After the tariff adjustment was recalculated to include the return of R\$ 714,339 to

consumers, this impact was an increase of 5.71% for Free Clients as from August 19, 2020. Also, the volume of energy transported in 3Q20 was 7.80% higher than in 3Q19.

CVA and Other financial components in tariff adjustments

In its financial statements Cemig recognizes the difference between actual noncontrollable costs (in which the CDE, and electricity bought for resale, are significant components) and the costs that were used as the basis for decision on the rates charged to consumers. In 3Q20 this item comprised a gain of R\$ 17,192, compared with an negative item of R\$ 35,122 in 3Q19. This difference mainly reflects higher additions to CVA revenue in 3Q20, due mainly to: (i) higher costs of supply from Itaipu, due to the higher dollar exchange rate than in 3Q19; and (ii) expenses on the National Grid approximately 40.5% higher than in 3Q19 after the revision in July 2020. These effects were partially offset by lower CDE charges, due to finalization of the ACR (Regulated Market) account in August 2019, and the result of the 2019 tariff adjustment, which was approved at a significantly higher level than in the previous year. The Company's CVA result for the quarter was R\$ 331,376 negative, after receipt of part of the funds from the Covid account in 3Q20.

Changes in balances of financial assets and liabilities:

Receipt of funds from the Covid Account	-1,280,344
Updating – Selic rate	5,593
Balance at September 30, 2020	-331,376

Transmission concession revenue

Cemig GT's revenue from transmission comprises the sum of the revenues from all the transmission assets. The concession contracts establish the Permitted Annual Revenue (*Receita Anual Permitida*, or RAP) for the assets of the existing system, updated annually, based mainly on the variation in the IPCA index (the IPCA index is applied to the contracts of Cemig GT, and the IGP–M index is applied to the contract of Cemig Itajubá). Whenever there is strengthening, improvement or adaptation of an existing asset made under a specific authorization from Aneel, an addition is made to the RAP.

This revenue was R\$ 134,328 in 3Q20, compared to R\$ 132,134 in 3Q19, 1.66% higher YoY, mainly as a result of the adjustment to annual RAP made in July 2020, of 3.69%, which includes the effects of inflation and also new revenues related to investments that have been authorized. It also includes an adjustment to expectation of cash flow from financial assets, due to the change in the fair value of the Regulatory Remuneration Base of Assets (BRR).

Transmission reimbursement revenue

The Company records the updating of the balance receivable for the indemnity (reimbursement of asset value) based on the IPCA inflation index, and the average Regulatory cost of capital, as specified in the regulation for the sector. The transmission indemnity revenue in 3Q20 was 21.99% higher than in 3Q19 – at R\$ 41,035, compared to R\$ 33,637 in 3Q19.

These revenues were mainly affected by the increase of remuneration at average cost of capital, which, as well as increasing from 6.64% in 3Q19 to 7.71% in 3Q20, as from June 30, 2020 began to be calculated on the re-measured Regulatory Remuneration Base (BRR), as a result of the periodic review of RAP.

At the beginning of the tariff cycle, which takes place in July of each year, the amounts received for the adjustment set for the cycle, corresponding to the amortization of the debtor balance up to the end of the period, are excluded from the remuneration base for updating, reducing the remuneration. The indemnity (reimbursement) is being received through the RAP (Permitted Annual Revenue) since 2017, over a period of 8 years, for the financial portion, and for the remaining period of the useful life of the assets, for the economic portion.

Revenue from power trading transactions on the Power Trading Exchange (CCEE)

Revenue from transactions in electricity on the CCEE in 3Q20 was R\$ 59,103, compared to R\$ 9,811 in 3Q19 – an increase of 502.42% year-on-year. This increase mainly reflects higher allocation of Cemig GT's own energy in 3Q20 than in 3Q19, associated with higher GSFs (Generation Scaling Factors), with a counterpart in the lower Spot price. Also, clients' consumption was lower due to the coronavirus crisis, resulting in a surplus of energy sold in the CCCE in 3Q20.

	Spot price	GSF				
Period	Cub montest	R\$/N	1Wh	2020	2010	
	Sub-market	2020	2019	2020	2019	
July	Southeast/Center-West	89.04	185.52	0.689	0.546	
August	Southeast/Center-West	85.15	237.29	0.628	0.488	
September	Southeast/Center-West	100.84	219.57	0.662	0.531	

Revenue from transactions in the Surpluses Sales Mechanism (MVE)

The revenues from transactions in the Surpluses Sales Mechanism (*Mecanismo de Venda de Excedentes* – MVE) were R\$ 47,690 in 3Q20, relating to offers of supply made at the end of 2019 by Cemig D. The MVE enables distributors to sell excesses of supply and, for sales related to amounts of the regulatory limit or involuntary overcontracting, enables part of the benefit gained to be restituted to the consumer in the tariff adjustment process.

Revenue from supply of gas

The Company reports revenue from supply of gas 26.45% lower YoY in 3Q20, at R\$ 427,940, compared to R\$ 581,869 in 3Q19. The lower amount basically reflects volume of gas sold 30.19% lower, at 198,080m³ in 3Q20, compared to 283,724m³ in 3Q19, mainly due to a reduction to of 99.70% YoY in the supply to thermoelectric generation plants, with near-zero consumption in the quarter, and a figure for the industrial sector 23.78% lower year-on-year. The effect of lower volume of gas sold was partially offset by the increase from application of the IGP-M inflation index to distribution costs, which occurs annually in February: the resulting increases were: 6.74% in 2019, and 7.81% in 2020.

Total	4,215	15,492	31,355	42,301	51,966	56,861

Taxes and charges on revenue

The total of these taxes and charges reported as deductions from revenue in 3Q20 was R\$ 2,858,090, or 8.07% less than in 3Q19 (R\$ 3,109,043).

The Energy Development Account – CDE

The amounts of payments to the Energy Development Account (CDE) are decided by an Aneel Resolution. The purpose of the CDE is to cover costs of concession indemnities (reimbursements of costs of assets), tariff subsidies, the subsidy for balanced tariff reduction, the low-income-consumer subsidy, the coal consumption subsidy, and the Fuels Consumption Account (CCC). The charges for contribution to the CDE in 3Q20 were R\$ 608,848 in 3Q20, compared to R\$ 638,919 in 3Q19, or 4.71% lower, mainly due to the termination of the Regulated Market Account ('the ACR Account'), in August 2019.

This is a non-manageable cost: the difference between the amounts used as a reference for setting of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

Consumer charges - the 'Flag' Tariff system

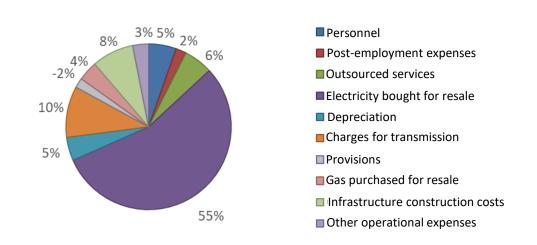

The 'Flag' Tariff bands are activated as a result of low levels of water in the system's reservoirs – tariffs are temporarily increased due to scarcity of rain. The 'Red' band has two levels – Level 1 and Level 2. Level 2 comes into effect when scarcity is more intense. Activation of the flag tariffs generates an impact on billing in the subsequent month.

Charges to the consumer arising from the 'Flag Tariff' system in 3Q20 were 99.98% lower year-on-year – at R\$ 16 in 3Q20, vs. R\$ 73,474 in 3Q19. The lower figure reflects non-application of the 'flag' system in July through September 2020, due to the exceptional temporary suspension of its systematic application, with the 'flag' set at 'green' up to December, 31, 2020, by Aneel dispatch 1511 of May 26, 2020.

The 'Flag' Tariff – history						
June 2020	Green	Jun. 2019	Green			
July 2020	Green	July 2019	Yellow			
Aug. 2020	Green	Aug. 2019	Red 1			
Sep. 2020	Green	Sep. 2019	Red 1			

Operational costs and expenses

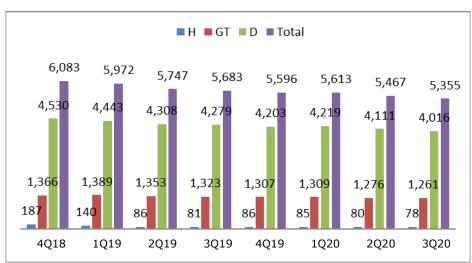

Operational costs and expenses in 3Q20 totaled R\$ 5,152,565, or 20.56% less than in 3Q19 (R\$ 6,486,375).

The following paragraphs comment on the main variations in expenses:

<u>People</u>

The expense on personnel in 3Q20 was R\$ 290,095, or 4.68% lower than in 3Q19 (R\$ 304,350). The lower figure reflects the number of employees being 6.90% lower, at 5,363 in 3Q20, compared to 5,733 in 3Q19, and the salary increase of 2.55% from November 2019, under the Collective Work Agreement.

Number of employees – by company

Employees' and managers' profit shares

The expense on employees' and managers' profit shares in 3Q20 was R\$ 75,602, compared to a reversal of R\$ 14,572 in 3Q19.

Electricity purchased for resale

The expense on electricity bought for resale in 3Q19 was R\$ 2,958,679, or 2.49% less than in 3Q19 (R\$ 3,034,108). This arises mainly from the following items:

- Expenses on supply from Itaipu 42.68% higher, at R\$ 531,183 in 3Q20, than in 3Q19 (R\$ 372,296). The difference mainly reflects the average US dollar exchange rate 34.44% higher in 3Q19 at R\$ 5.43 in 3Q20, compared to R\$ 4.04 in 3Q19; and the higher price of energy in US dollars, at R\$ 28.41/kW for the whole of 2020, compared with US\$ 27.71/kW for 2019.
- Expenses on energy acquired at auction 6.08% lower in 3Q20, mainly reflecting the lower average price of power contracts in the auctions.
- Lower expense on purchase of supply at the spot price: R\$ 193,868 in 3Q20, compared to R\$ 486,177 in 3Q19. This lower figure is mainly due to the average spot price being 61.83% lower, at R\$ 91.67/MWh in 3Q20, compared to R\$ 214.12/MWh in 3Q 19; and also to the creditor position assumed by Cemig D in 3Q20, higher than the position assumed in 3Q19, due to lower consumption caused by the Covid-19 pandemic.

For Cemig D, purchased energy is a non-manageable cost: the difference between the amounts used as a reference for calculation of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

Consolidated R\$ '000	3Q20	3Q19	Change
Supply from Itaipu Binacional	531,183	372,296	42.7%
Physical guarantee quota contracts	197,520	163,052	21.1%
Quotas for Angra I and II nuclear plants	75,742	67,293	12.6%

Acquired in Regulated Market auctions		775,023	805,067	-3.7%
Proinfa		77,933	95,308	-18.2%
Distributed generation		157,551	54,491	189.1%
Credits of PIS, Pasep and Cofins taxes		-164,901	-161,575	2.1%
	-	1,909,352	1,925,972	-0.9%

Charges for use of the transmission network

Charges for use of the national grid in 3Q20 were R\$ 534,788, or 42.15% higher than in 3Q19 (R\$ 376,216). This expense is payable by electricity distribution and generation agents for use of the facilities that are components of the national grid. The amounts to be paid are set by an Aneel Resolution.

The higher figure reflects the annual adjustment in charges for the National Grid, normally applied in July, which had an effect of approximately 41% in 3Q20.

This is a non-manageable cost in the distribution activity: the difference between the amounts used as a reference for calculation of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

Gas bought for resale

In 3Q20 the Company's expense on acquisition of gas was R\$ 207,361, 44.72% less than its comparable expense of R\$ 375,140 in 3Q19. This basically reflects volume of gas purchased 30.93% lower, at 197,315m³ in 3Q20, compared to 285,686m³ in 3Q19.

Post-retirement obligations

The impact on operational profit of the Company's post-retirement obligation was an expense of R\$ 110,512 in 3Q20, compared to an expense of R\$ 105,397 in 3Q19. This is mainly the result of reduction in the discount rate used in the actuarial calculation – which increased the amount of the actuarial liabilities, and consequently the scale of the expense reported.

Operational provisions

The Company posted a reversal of R\$ 101,606 in operational provisions in 3Q20, compared to inclusion of new provisions totaling R\$ 1,297,003 in 3Q19. This arises mainly from the following items:

- In 3Q19 the Company posted net contingency provisions for tax legal actions of R\$ 1,175,896 – while in 3Q20 it posted provisions of only R\$ 17,747 in the same category: the major item in 3Q19 was a provision of R\$ 1,182,613, based on the opinion of the Company's legal advisers, for probability of loss in legal actions arguing for application of Social Security contributions to payment of profit shares without prior agreement on productivity indicator targets.
- Reversal, totaling R\$ 156,829, of losses expected from doubtful receivables, in 3Q20, compared to posting of new provisions of R\$ 101,383 in 3Q19. This comprises mainly a reversal of a provision of R\$ 231 million for debt owed to the Company by the State of Minas Gerais; non-realization of the loss expected in the second quarter from effects of the Covid-19 pandemic; and good acceptance by clients of the rules for negotiation approved by the Company, which reduced default in 3Q20.

Default – Cemig D

The start of 2020 was marked by a high degree of uncertainty in the social and economic spheres both in Brazil and worldwide, with the proliferation of the public health crisis caused by the Covid-19 coronavirus, and its arrival in Brazil.

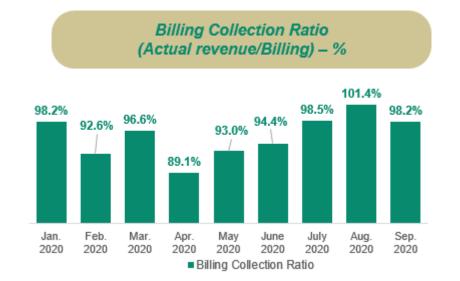

To try to mitigate the impacts of the pandemic and help sustain its clients' payment capacity, Cemig is launched special payment conditions to help, principally, low-income clients, hospitals and micro-companies. New channels of payment, such as new debit and credit cards, were put in place, to expand consumers' payment options.

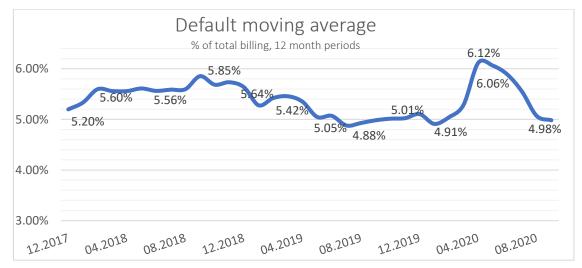

New channels of communication, such as WhatsApp, have been put in place, as well as campaigns to enrich the client registry information. These were adopted in April. These measures aim to expand the scope and efficiency of the tools for approaching consumers, including approach for negotiations.

After Aneel's authorization to resume disconections in August for residential customers, which were not classified as low income, Cemig intensified the cuts of non-paying customers, having made 237 thousand cuts between August and October.

The measures adopted by the company contributed to avoid a further increase in default and made possible an improvement after the period between April and June 2020.

Share of profit (loss) in associates and joint ventures

For its interests in non-consolidated investees the Company posted a gain of R\$ 97,822 by the equity method in the quarter. This figure was 69.30% higher than in 3Q19, mainly reflecting a higher contribution from Taesa, of R\$ 135,976 in 3Q20, compared to R\$ 77,027 in 3Q19.

Note: The result of Companhia de Transmissão Centroeste de Minas is no longer included in this account (equity income), following conclusion of purchase by the Company of the remaining stake in Centroeste in January 2020.

Gain (loss) in non-consolidated investees (equity method)	3Q20	3Q19

(1) Ebitda is a non-accounting measure prepared by the Company, reconciled with the consolidated Interim financial information in accordance with CVM Circular SNC/SEP 1/2007 and CVM Instruction 527 of October 4, 2012. It comprises Net income adjusted by the effects of net financial revenue (expenses), Depreciation and amortization, and Income tax and social contribution tax. Ebitda is not a measure recognized by Brazilian GAAP nor by IFRS; it does not have a standard meaning; and it may be non-comparable with measures with similar titles provided by other companies. Cemig publishes Ebitda because it uses it to measure its own performance. Ebitda should not be considered in isolation or as a substitution for net income or operational profit, nor as an indicator of operational performance or cash flow, nor to measure liquidity nor the capacity for payment of debt.

(2) The Company adjusts the EBTIDA measured according to CVM Instruction 527 removing non-current items, which, because of their nature, do not contribute towards information on the potential of future cash generation, since they are extraordinary items.

Financial revenue and expenses

The Company reports Net financial expenses in 3Q20 of R\$ 496,619, which compares with R\$ 233,791 in 3Q19. This reflects two main factors:

Lower variation in the fair value of the hedge instrument in 3Q20, totaling R\$ 2,651, compared to a negative FX effect on the principal of the debt in foreign currency (Eurobonds), of R\$ 247,050 – generating a net negative variation of R\$ 244,399.

In 3Q19, there was (a) a positive YoY increase in the fair value of the hedge instrument, of R\$ 485,836, and (b) an expense from FX variation of the debt in foreign currency, of R\$ 498,300, generating a net negative variation of R\$ 12,464.

R\$ '000	3Q20	3Q19
Gain on hedge	2,651	485,836
Effect on the principal of the Eurobond debt	247,050	498,300

Cemig's consolidated electricity market

The Cemig Group makes its sales of electricity through its distribution company, Cemig Distribuição ('Cemig D'), its generation and transmission company Cemig Geração e Transmissão ('Cemig GT'), and other wholly-owned subsidiaries: Horizontes Energia, Sá Carvalho, Cemig PCH, Rosal Energia, the *Praias de Parajuru* and *Volta do Rio* wind farms, Cemig Geração Camargos, Cemig Geração Itutinga, Cemig Geração Salto Grande, Cemig Geração Três Marias, Cemig Geração Leste, Cemig Geração Oeste, and Cemig Geração Sul.

This market comprises sales of electricity to:

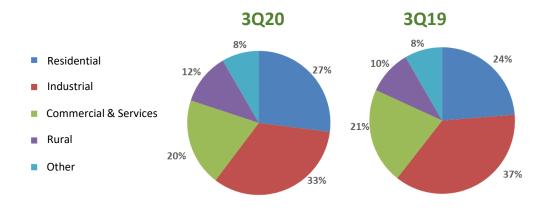

- (I) captive consumers in Cemig's concession area in the State of Minas Gerais;
- (II) Free Consumers in both the State of Minas Gerais and other States of Brazil, in the Free Market (*Ambiente de Contratação Livre*, or ACL);
- (III) other agents of the electricity sector traders, generators and independent power producers, also in the ACL; and
- (IV) Distributors, in the Regulated Market (Ambiente de Contratação Regulada ACR).

The Cemig group traded a total of 12,994,406 MWh on the CCEE in 3Q20, 6.2% less than in 3Q19. Sales of electricity to final consumers, plus Cemig's own consumption, totaled 9,843,657 MWh, or 8.5% less than in 3Q19. Sales to distributors, traders, other generating companies and independent power producers in 3Q20 were 3,150,749 MWh – or 1.6% more than in 3Q19.

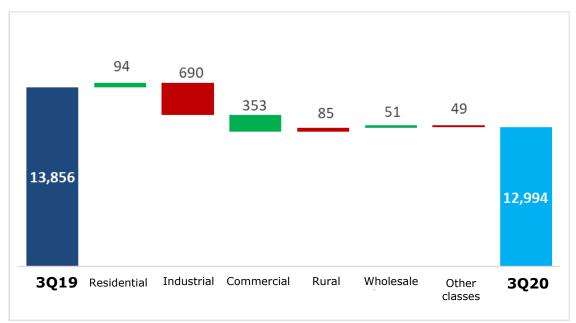

In September 2020 the Cemig Group invoiced 8,669,868 clients – a growth of 1.9% in the consumer base since September 2019. Of these, 8,669,487 were in the group comprising final consumers and Cemig's own consumption; and 381 were other agents in the Brazilian power industry.

This chart shows the percentages of the Cemig Group's sales to final consumers:

Total consumption of electricity (GWh): down 6.2% YoY in 3Q

The electricity market of Cemig D

Electricity billed to captive clients and electricity transported for Free Clients and distributors with access to Cemig D's networks in 3Q20 totaled 11,319,188 MWh, or 1.4% more than in 3Q19. This increase has two components: consumption of the captive market 3.6% lower YoY, and use of the network by Free Clients 7.8% higher YoY.

Captive clients + Transmission service (MWh)	3Q20	3Q19	Change, %
Residential	2,652,121	2,557,935	3.7%
Industrial	5,341,739	5,060,476	5.6%
Commercial, Services and Others	1,259,852	1,513,968	-16.8%

Public lighting	327,039	348,477	-6.2%
Public services	347,469	315,588	10.1%
Concession holder (Distribution company)	91,645	91,201	0.5%
Own consumption	7,559	11,012	-31.4%
Total	11,319,188	11,162,340	1.4%

Captive clients + Transmission service (MWh)

Residential

Residential consumption, comprising 23.4% of the energy distributed by Cemig D in 3Q20, was 3.7% higher than in 3Q19. This increase is related to the addition of 168,914 new consumer units since September 2019; and also to an increase in average monthly consumption per consumer of approximately 1.2%.

Industrial

Consumption by the *industrial* consumer category was 47.2% of the total volume of electricity distributed by Cemig D, and totaled 5,341,739 MWh in 3Q20, or 5.6% more than in 3Q19. Energy consumed by captive clients totaled 462,136 MWh in 3Q20, 19.4% less than in 3Q19. The volume of energy transported for industrial Free Clients was 43.1% of the total of energy distributed, and was 4,879,603 MWh in 3Q20, 8.7% more than in 3Q19.

Commercial and Services

Energy distributed to the *commercial* category of clients was strongly impacted by the pandemic and the resulting restriction on functioning of companies, and did not recover to the same degree as other client categories in 3Q20, but was 16.8% lower than in 3Q19.

CANIC

Volume was down 20.0% YoY in the captive market, and down 4.40% YoY in the Free Market. The total energy used by captive clients plus energy transported for Free Clients in the category totaled 11.1% of the energy distributed by Cemig D in 3Q20.

Rural

Consumption by the rural category increased 7.9% compared to 3Q19, as the sector remains in full activity even in the face of the pandemic and due to less rainfall.

Number of clients

A total of 8,669,160 consumers were billed in September 2020, or 163,299 more than in September 2019. Of this total, 1,683 were Free Clients using the distribution network of Cemig D.

Cemig D	Number o	Change,	
	3Q20	3Q19	%

SUPPLY QUALITY INDICATORS – DECi and FECi

Cemig is continuously taking action to improve operational management, organization of the logistics of its emergency services, and has a permanent routine of preventive inspection and maintenance of substations and distribution lines and networks. It also invests in training of its staff for improved qualifications, state-of-the-art technologies, and standardization of work processes, aiming to maintain the quality of electricity supply, and as a result maintain satisfaction of clients and consumers.

The charts below show Cemig's indicators for duration and frequency of outages – DECi (Average Outage Duration per Consumer, in hours), and FECi (Average Outage Frequency per Consumer, in number of outages), since January 2016.

Quality indicators are linked to the new concession contract of Cemig D (distribution), signed in 2015.

Note: Figures for 2016 and 2017 are according to recalculation presented by the Company to Aneel.

DEBT

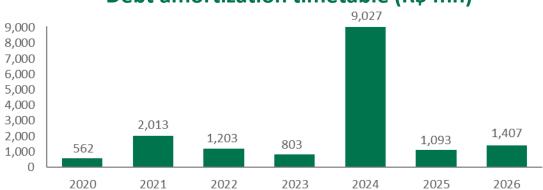

The Company's consolidated gross debt on September 30, 2020 was R\$ 16,106,701, or R\$ 1,330,710 higher than at the end of 2019, mainly reflecting the loss in value of the Real, which resulted in an increase of the dollar-denominated debt, in Reais, of R\$ 2.4

billion in the period. It is important to note that the Company also records a net positive balance on hedge transactions for the Eurobond issue, in the total amount of R\$ 3,284,142: R\$ 1,606,656 for the principal of the debt, and R\$ 1,677,486 for the interest. The total net asset value of the hedge is R\$ 1,593,198 greater than at the end of 2019.

In the first nine months of 2020 a total of R\$ 2,187,264 in debt was amortized. During the period new funds of R\$ 850,000 were raised, by Cemig, through its 8th debenture issue, in September 2020.

Source: Economática – Adjusted for corporate action, including dividends.

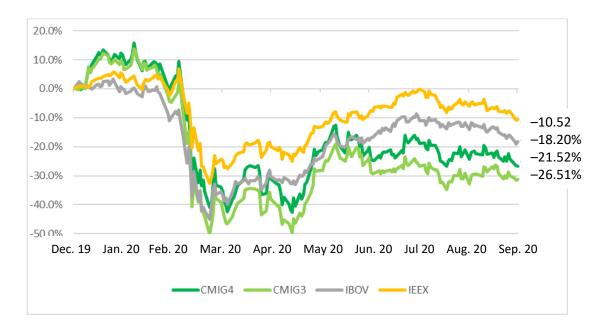

Trading volume in Cemig's preferred shares (CMIG4) in 9M20 was R\$ 24.7 billion, of which R\$ 7.5 billion was traded in the third quarter, corresponding to a daily average of R\$ 115.28 million – 14.66% lower than in 3Q19. Trading volume in Cemig common shares in 9M19 was R\$ 4.4 billion, with daily trading volume of R\$ 22.86 million in the third quarter.

By volume (aggregate of common (ON) and preferred (PN) shares), Cemig's shares were the third most liquid in Brazil's electricity sector in the period, and among the most traded in the whole Brazilian equity market. On the New York Stock Exchange the volume traded in ADRs for Cemig's preferred shares (CIG) in 9M20 was US\$1.81 billion.

We see this as reflecting recognition by the investor market of Cemig as a global investment option.

The Ibovespa index of the São Paulo Stock Exchange (B3) was down 18.20% in the first nine months of 2020, still under the influence of the Covid-19 epidemic, closing September at 94,603 points. Cemig's shares accompanied the index: the common (ON) shares were down 26.51% in 9M19, and the preferred (PN) shares down 21.52%. In New York the ADRs for Cemig's common shares were down 49.47% in the period, and the ADRs for the preferred shares were down 41.16%.

The 'Covid Account'

On May 18, 2020, in response to the state of public calamity caused by the Covid-19 pandemic, Decree 10350/2020 authorized creation of the 'Covid Account', the purpose of which was to cover deficits, or anticipate revenue, of holders of concessions or permissions to distribute electricity – the basis of the financial flows of the electricity sector, especially related to: (i) overcontracting of supply; (ii) the CVA ('Portion A' Variation Compensation Account); (iii) neutrality of sector charges; (iv) postponement until June 30, 2020 of the results of tariff review processes for distributors ratified up to that date; and (v) bringing forward of the regulatory asset relating to Portion B, as per an Aneel regulation and timetable decided by the distributor.

On June 23, 2020 Aneel issued Normative Resolution 885/2020, setting the criteria and procedures for management of the Covid Account, and also regulating use of the CDE tariff charge. Under this Resolution, the amounts transferred to each distributor are reverted as negative financial components in tariff adjustment processes of 2021 and 2022, duly updated by the Selic rate, with neutrality assured.

Cemig D accepted the financial offsetting mechanism of the Covid Account, with a view to strengthening its cash position, enabling compliance with its financial obligations even during the reduction of revenue caused by the severe economic downturn.

On July 9, 2020, Aneel announced the total of funds in the 'Covid Account' to be allocated to Cemig D: R\$ 1,404,175. This is being paid in stages.

In the third quarter of 2020 Cemig D received R\$ 1,280,345 – comprising R\$ 1,186,390 on July 31, R\$ 50,945 on August 12, and R\$ 43,010 on September 14, 2020.

Of the rest, R\$ 33,549 was received on October 13, 2020, and the remaining total of R\$ 90,281 will be paid in three tranches in November 2020 through January 2021.
