Bradesco composes 2020 Dow Jones Sustainability Index

Banco Bradesco S.A. ("Bradesco" or "Bank") announces that, for the 15th time, it has been selected to compose the Dow Jones Sustainability Indices (DJSI), integrating the World and Emerging Markets portfolios of the 2020-2021 edition.

Bradesco has achieved the best performance among Brazilian banks and the fifth position among the more than 250 banks evaluated globally.

Customer Relationship Management, Climate Strategy, Anti-Crime Policy and Measures, Financial Inclusion, Risk & Crises Management, Corporate Citizenship & Philanthropy, and Environmental and Social Reporting are some of the topics in which the Bank has obtained its best scores.

Created in 1999, the DJSI assesses the best practices in corporate sustainability, assigning differentiated value to companies that stand out for the management of environmental, social and governance (ESG) factors of their businesses.

This result demonstrates the strategic vision and the continuous evolution of the management of ESG aspects, with a focus on generating long-term value for all stakeholders, reinforcing Bradesco's mission in contributing to sustainable development.

Cidade de Deus, Osasco, SP, November of 2020
