Trading of Shares Issued by the Company

**1. Justify in detail the objectives and the economic effects expected from the operation.**

**Objective:** to use a portion of the funds in the "Profit Reserves - Statutory", available for investments, in the acquisition of shares to be held in treasury and subsequently sold or cancelled, to be resolved in due time.

**Economic Effects:**

For shareholders, the operation enables greater financial returns due to the proportional increase in the amount of dividends/interest on shareholder's equity distributed per share, given that shares held in treasury do not have economic or political rights (Article 10 – CVM Instruction No. 567/2015). Consequently, the amounts to be declared as dividends/interest on shareholder's equity will be paid exclusively to shares outstanding in the market.

For Bradesco, the operation, within the validity term established, is designed to identify market opportunities, maximizing the allocation of funds available in reserves, while limiting outflows so as not to affect its results.

**2. State the number of shares (i) outstanding and (ii) already held in treasury.**

Not applicable. The shares will be acquired at market price through operations held at B3.

**13. Specify the reasons why the members of the Board of Directors believe that the share buyback will not affect compliance with the obligations assumed with creditors nor the payment of mandatory, fixed or minimum dividends.**
