## Early start-up of the Jandaíra Wind Complex

COPEL (“Company”), a company that generates, transmits, distributes and sells power, informs its shareholders and the market in general that five wind turbines of the Jandaíra Wind Complex (“Complex”), which total 17.3 MW of installed capacity, started, on this date, the test operation, according to ANEEL Order No. 958, of April 8, 2022. During the test period, the energy generated will be pay out at the Differences Settlement Prices (PLD) on the CCEE Spot Market.

The other wind turbines belonging to the Complex will start operating in a staggered manner until the end of 2022, more than two years before the deadline for delivery of the contracted supply.

100% owned by Copel GeT, the Complex is located in the municipality of Jandaíra, in the state of Rio Grande do Norte, is composed of four wind farms, totaling 90.1 MW of installed capacity, and is financed by Banco do Nordeste do Brasil. - BNB for approximately 50% of the planned investment.

<sup>1</sup> LEN - Auction of energy from new projects

<sup>2</sup> Updated until Mar/2022. Source: CCEE.

The start-up of this project reinforces the Company's strategy of sustainable growth and its commitment to creating value through investments in projects that contribute to the diversification and expansion of its portfolio through renewable energy sources. When the 26 wind turbines are in operation, wind generation will represent 14% of Copel's total installed capacity.

Curitiba, April 11, 2022.
