1. Justify in detail the objective and the economic effects expected from the operation

Objective: to use a portion of the funds in the "Profit Reserves - Statutory", available for investments, in the acquisition of shares to be held in treasury for subsequent cancellation, without stock capital reduction.

Economic Effects: For shareholders, the operation enables greater financial return due to the proportional increase in the amount of dividends/interest on shareholder's equity distributed per share, given that shares held in treasury do not have economic or political rights (Article 11 – CVM Resolution No. 77/2022). Consequently, the amounts to be declared as dividends/interest on shareholder's equity will be paid exclusively to shares outstanding in the market.

For Bradesco, the operation, within the validity term established, is designed to identify market opportunities, maximizing the allocation of funds available in reserves, in amounts whose expense will not affect their results.

2. State the number of shares (i) outstanding and (ii) already held in treasury

outstanding		In treasury

6. In the event of operations held outside organized securities market, state: a. the maximum (minimum) price for which shares will be acquired (disposed of); and b. the reasons that justify the operation at prices more than ten percent (10%) higher, in the case of acquisition, or more than ten percent (10%) lower, in the case of disposal, than the average of share price, weighted by volume, in the ten (10) previous trading sessions, where applicable.

Not applicable. The shares will be acquired at market price, through operations at B3.

7. State the impacts of the trading on the composition of the Company's shareholding control or administrative structure, if any.

Not applicable, considering that Bradesco's control is defined and the maximum number of shares to be acquired is insufficient to affect the composition of the Company's shareholding control or administrative structure.

8. Identify the counterparties, if known, and, in the case of a related party, as defined by the accounting rules governing this matter, provide information as required by Article 9 of CVM Resolution No. 81, dated March 29, 2022.

As the operations will be held at B3, the counterparties are not known.

9. Indicate the allocation of the proceeds, if applicable.

Not applicable, since the shares acquired within the renewed program will be held in treasury.

Consequently, the allocation of the proceeds will only be known depending on the decision regarding the cancellation of the shares, which will be made in due time and informed to the Market.

10. Indicate the maximum term for the settlement of the authorized operations.

The maximum term is 18 months, from May 8, 2025 to November 8, 2026.

12. Describe the funds available for use, pursuant to Article 8, paragraph 1 of CVM Resolution No. 77, dated March 29, 2022.

Funds from the "Profit Reserves – Statutory" account, in the Company's Net Equity, will be used.

13. Specify the reasons why the members of the Board of Directors believe that the share buyback will not affect the compliance with the obligations assumed with creditors nor the payment of mandatory, fixed or minimum dividends.

The Board of Directors believes that the acquisition of shares to be held in treasury, within the approved limits, will not affect the compliance with the obligations assumed with its creditors, nor will it affect the payment of mandatory dividends.

In these terms, it is worth noting that Bradesco manages its reserves in accordance with estimates of funds available for investment, considering its regular operations.
