

## Closing – Copel Uncrossing

Rio de Janeiro, May 30, 2025, Centrais Elétricas Brasileiras S/A – Eletrobras, together with its subsidiary Companhia de Geração e Transmissão de Energia Elétrica do Sul do Brasil – CGT Eletrosul, and in continuation of the relevant fact of December 12, 2024, informs that, after meeting the precedent conditions, it has finalized, on this date, the uncrossing of interests/assets agreed with Copel Geração e Transmissão and Companhia Paranaense de Energia – Copel

With the conclusion of the transaction, Eletrobras will now consolidate an additional 300 MW of hydroelectric capacity to its portfolio (UHE Colíder), with potential use of operational synergies with other assets owned and located on the Teles Pires river (UHE Teles Pires – 1,820 MW, UHE Sinop – 402 MW and UHE São Manoel – 700 MW). UHE Colíder has contracts in the Regulated Contracting Environment (ACR) for approximately 70% of its Physical Guarantee, with a term until 2044, and contracts in the Free Contracting Environment (ACL) for the remaining Physical Guarantee, with terms until 2029.

Eletrobras transferred all of its minority interests in Mata de Santa Genebra Transmissão S.A. - MSG - and in the Mauá Hydroelectric Plant - UHE Mauá - to Copel, receiving in return, in addition to UHE Colíder, a payment in cash of R\$196.6 million, after adjustments provided for in the contract, such as the receipt of dividends from MSG.

The operation reinforces Eletrobras' commitment to optimizing minority interests with value generation, following capital discipline, and simplifying its structure as provided for in its Strategic Plan.
