(1) On July 20, 2011, Fitch Ratings introduced to the market the Viability rating for financial institutions around the globe, which reflects the same primary risks evaluated in the former Individual Rating. Fitch emphasizes that this is not a fundamental change in its approach to bank ratings or a change in opinion on the creditworthiness of the entities covered. For Bradesco, the Individual Rating 'B/C' was changed to Viability Rating 'a-'. To facilitate the transition, Fitch Ratings will maintain both ratings up to December 31, 2011.

Summarized Analysis of Adjusted Income

To provide for better understanding, comparison and analysis of Bradesco's results, we use the Adjusted Statement of Income for analysis and comments contained in this Report on Economic and Financial Analysis, obtained from adjustments made to the Book Statement of Income, detailed at the end of this Press Release, which includes

adjustments to non-recurring events shown in the previous page. Note that the Adjusted Statement of Income is the basis adopted for the analysis and comments made in Chapters 1 and 2 of this report.

Summarized Analysis of Adjusted Income

Adjusted Net Income and Profitability

In the third quarter of 2011, Bradesco's adjusted net income stood at R\$2,864 million, a 1.4% or R\$39 million increase from the previous quarter, mainly due to: (i) financial margin gains, result of a greater volume of operations and treasury/securities gains; (ii) an increase in fee and commission income; partially offset by: (iii) higher personnel and administrative expenses due to collective bargaining agreement and organic growth in the period; and (iv) an increase in the allowance for loan losses driven, mainly, by greater volume of loan operations.

In the first nine months of 2011 versus the same period last year, adjusted net income increased by R\$1,307 million, or 18.4%. The main reasons for this result are described in this chapter, among which Bradesco's organic growth stands out.

Shareholders' Equity for September 2011 stood at R\$53,742 million, up 16.5% on the balance of September 2010. The Capital Adequacy Ratio stood at 14.7%, 12.2% of which fell under Tier I Reference Shareholders' Equity.

Total Assets came to R\$722,289 million in September 2011, up 18.0% over September 2010, driven by the increase in operations and the expansion of business volume. Return on Average Assets (ROAA) remained stable, hovering around 1.7%.

Summarized Analysis of Adjusted Income

Efficiency Ratio (ER)

The “adjusted-to-risk” Efficiency Ratio, which reflects the impact of risk associated with loan operations⁽²⁾ was up by 0.9 p.p. when compared to the third quarter of 2010. This growth was the result of a drop in delinquency in the period in question.

The ER in the last 12 months⁽¹⁾ was stable in comparison with the previous quarter.

The quarterly ER increased from 42.0% in the second quarter of 2011 to 42.9% this quarter, mainly due to: (i) higher personnel expenses, mainly resulting from an increase in salary levels (collective bargaining agreement); and (ii) increased administrative expenses driven by organic growth in the period. Excluding the effect of salary increases arising from collective bargaining agreement and adjustment of labor obligations, the quarterly ER would have remained virtually stable in comparison with the previous quarter.

(1) Efficiency Ratio (ER) = (Personnel Expenses – Employee Profit Sharing (PLR) + Administrative Expenses) / (Financial Margin + Fee and Commission Income + Income from Insurance + Equity in the Earnings (Losses) of Unconsolidated Companies + Other Operating Income – Other Operating Expenses). Considering the ratio between: (i) total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation + Insurance Selling Expenses) and (ii) revenue net of related taxes (not considering Claims and Selling Expenses from the Insurance Group), our Efficiency Ratio in the third quarter of 2011 would be 45.5%; and

(2) Including Allowance for Loan Losses (ALL) expenses, adjusted for granted discounts, loan recovery and sale of foreclosed assets, among others.

Summarized Analysis of Adjusted Income

Financial Margin

The R\$759 million increase in the third quarter of 2011 compared to the second quarter of 2011 was due to:

- a R\$502 million increase in interest-earning operations, mainly due to higher gains with “Loan” and “Funding” margins; and
- a R\$257 million increase in the non-interest margin, due to treasury/securities gains.

Financial margin posted a R\$5,025 million improvement between the first nine months of 2011 and the same period in 2010, for growth of 20.9% mainly driven by:

- a R\$4,712 million increase in income from interest-earning operations due to: (i) higher gains from “Loan” margin, resulting from an increase in business volume; (ii) higher income from “Funding” margin; and (iii) increased income from “Insurance” margin; and
- greater income from the non-interest margin, in the amount of R\$313 million, due to higher treasury/securities gains.

Summarized Analysis of Adjusted Income

Expanded Loan Portfolio⁽¹⁾

In September 2011, Bradesco's loan operations totaled R\$332.3 billion. The 3.9% increase in the quarter was due to growth of: (i) 5.6% in SMEs; (ii) 3.9% in Corporate; and (iii) 2.4% in Individuals.

Over the last twelve months, the portfolio expanded by 22.0%, driven by: (i) 27.0% growth in Corporate; (ii) 25.8% growth in SMEs; and (iii) 13.3% growth in Individuals.

In the Individuals segment, the products that posted the strongest growth in the last twelve months were: (i) real estate financing; (ii) payroll-deductible loans; and (iii) BNDES/Finame onlending. In the Corporate segment, growth was led by: (i) operations with credit risk – commercial portfolio, which include debentures and promissory notes; (ii) BNDES/Finame onlending; and (iii) real estate financing – corporate plan.

(1) Includes sureties, guarantees, letters of credit, and advances of credit card receivables, debentures, and promissory notes, assignment of receivables-backed investment funds and mortgage-backed receivables and rural loan.

For more information, see page 38 of Chapter 2 of this Report.

Allowance for Loan Losses (ALL)

In the third quarter of 2011, expenses with the allowance for loan losses stood at R\$2,779 million, up 14.0% on the previous quarter, mainly due to: (i) a 3.8% increase in the volume of loan operations – Brazilian Central Bank concept; and (ii) a slight increase in delinquency in the period.

In the first nine months of 2011 compared to the same period of 2010, ALL expenses posted an 18.2% increase, in line with the growth of generic provisions, given that indicators of delinquency (over 60 and 90 days) remained practically stable. Loan operations – Brazilian Central Bank concept grew by 19.9% in the same period, demonstrating growth accompanied by quality in Bradesco's loan portfolio.

(1) In the 3Q11, includes exceeding ALL in the total amount of R\$1.0 billion.

Summarized Analysis of Adjusted Income

Delinquency Ratio > 90 days

The Delinquency ratio of over 90 days posted an increase of 0.1 p.p. in the quarter, mainly due to the 0.3 p.p. increase in the Individuals indicator, which occurred, partially, thanks to the change in criteria for identifying delinquency in credit card operations and the 0.1 p.p. increase in that of the SME segment.

Coverage Ratios

The following graph presents the evolution of the coverage ratio of the Allowance for Loan Losses for loans overdue for more than 60 and 90 days. In September 2011 these ratios reached 159.6% and 194.0%, respectively. It is important to note that in the third quarter of 2011, the Bank recorded an additional provision in the amount of

R\$1.0 billion to cover an eventual economic downturn worldwide and its impacts on the Brazilian economy.

The balance of Allowance for Loan Losses (ALL) of R\$19.1 billion in September 2011 was made up of: (i) R\$15.1 billion in Brazilian Central Bank requirements; and (ii) R\$4.0 billion in additional provisions.

Income from Insurance, Private Pension Plan and Savings Bond Operations

Net Income in the third quarter of 2011 came to R\$780 million (R\$800 million in the second quarter of 2011), posting Return on Average Shareholders' Equity of 28.2%.

In the first nine months of 2011, Net Income totaled R\$2.341 billion, up 10.2% compared to the Net Income recorded in the same period last year (R\$2.125 billion), for return on Shareholders' Equity of 26.5%.

(1) Excludes the effects of RN 206/09 (ANS), which as of January 2010 extinguished the PPNG (SES), with income from premiums accounted pro-rata temporis. Note that this accounting change did not affect Earned Premiums; and

(2) 3Q11 considers the latest data made available by Susep (July 2011).

Summarized Analysis of Adjusted Income

In the third quarter of 2011, the Savings Bond and Health segments posted growth of 13.0% and 4.4%, respectively, while Life and Pension Plan products were down from the second quarter of 2011, as a result of extraordinary growth of 42.1% in the previous quarter.

In the first nine months of 2011, production grew by 20.4% compared to the same period last year, due to the performance of Life and Pension Plan, Health and Savings Bond products, which increased 21.9%, 23.0% and 26.5%, respectively.

Net income in the third quarter of 2011 was in line with the previous quarter's results, with main performance indicators posting slight improvements, including a 0.7 p.p. drop in the claims ratio.

Net income for the first nine months of 2011 was 10.2% higher than the figure posted in the same period last year, due to: (i) 20.4% growth in revenues; (ii) a 0.6 p.p. decrease in claims ratio; (iii) improved financial result and equity in the earnings (losses) of subsidiaries; and partially offset by: (iv) an increase in personnel expenses, driven by the collective bargaining agreement in January 2011.

In terms of solvency, Grupo Bradesco de Seguros e Previdência complies with Susep rules effective as of January 1, 2008, and international standards (Solvency II). The Group's financial leverage ratio stood at 2.8 times Shareholders' Equity.

Summarized Analysis of Adjusted Income

Fee and Commission Income

In the third quarter of 2011, fee and commission income totaled R\$3,876 million, up 3.3% or R\$125 million from the previous quarter. This increase was mainly driven by: (i) higher credit card revenue; (ii) the increase in fund management revenue (iii) higher checking account revenue, arising from a net increase in the number of accounts; and (iv) greater collection revenue; offset by: (v) lower gains with capital market operations (underwriting/ financial advisory services).

When comparing the first nine months of the year with the same period in 2010, the R\$1,333 million increase, or 13.6%, in fee and commission income was mainly due to: (i) the performance of the credit card segment, driven by the growth in card base and revenues, in addition to the increase in interest held in Visavale; (ii) higher income from checking accounts, which was driven by growth in business volume and an increase in checking account base, which posted net growth of 2.2 million accounts in the period; (iii) greater income from loan operations, arising from the increase in sureties and guarantees and the higher volume of contracted operations; (iv) growth in revenue from fund management; (v) greater revenue from collections; and (vi) the increase in revenue from consortium management.

Summarized Analysis of Adjusted Income

Personnel Expenses

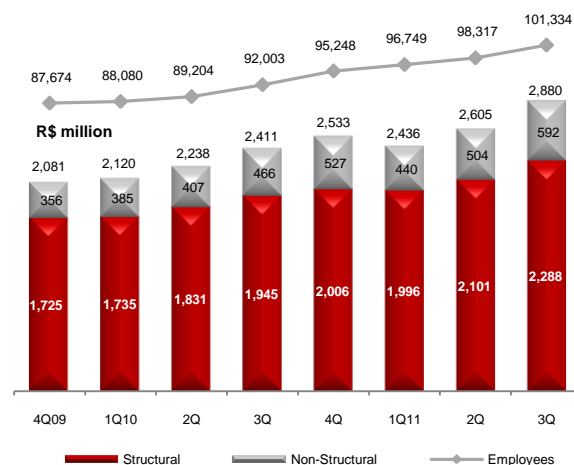

In the third quarter of 2011, the R\$275 million increase from the previous quarter was due to the following:

- “structural” – R\$ 187 million growth, mainly resulting from: (i) an increase in salaries, arising from the collective bargaining agreement and the adjustment of labor obligations; (ii) higher expenses with salaries, social charges and benefits due to the Bank's organic growth, which led to opening of new service points and consequent growth of staff; and
- “non-structural” – increase of R\$88 million, mainly related to greater expenses with employee and management profit sharing (PLR).

Growth between the first nine months of 2011 and the same period in 2010 of R\$1,152 million is mainly due to:

- R\$874 million in the “structural” portion from: (i) increased expenses with salaries, social charges and benefits, due to higher salary levels; (ii) and the increase in the number of employees; and

- R\$278 million in the “non-structural” portion, mainly driven by: higher expenses with provisions for labor claims; and (ii) higher expenses with employee and management profit sharing (PLR).

Obs.: Structural Expenses = Salaries + Compulsory Social Charges + Benefits + Private Pension Plans.

Non-Structural Expenses = Employee Profit Sharing (PLR) + Training + Labor Provision + costs with termination of contracts.

Summarized Analysis of Adjusted Income

Administrative Expenses

In the third quarter of 2011, administrative expenses increased by 7.1% over the previous quarter, mainly due to higher expenses with: (i) third party services, chiefly arising from: (a) variable expenses from the placement of Cards and CDC products (i.e. Call Centers); and (b) legal and corporate consulting services; (ii) data processing; and (iii) transportation.

The 17.5% increase in the first nine months of 2011 over the same period in 2010 is the result of higher expenses with: (i) outsourced services, related to: (a) partial outsourcing of credit card processing (Fidelity); and (b) variable expenses related to revenue (e.g. non-bank correspondents); (ii) an increase in business and service volume; (iii) agreement amendments and (iv) expenses directly related to the expansion of the Customer Service Network by 10,040 units, as follows: 447 branches, 134 PAB/PAE/PAA, 6,485 Bradesco Expresso units and 2,974 other service points, amounting to 62,055 locations on September 30, 2011.

Other Operating Revenue and Expenses

Other operating expenses, net of other operating income, totaled R\$907 million in the third quarter of 2011, up R\$143 million over the previous quarter, basically a result of: (i) higher expenses with the recording of operating provisions, especially civil provisions; and (ii) the reversal of the provision recorded in the second quarter of 2011, related to IBNR and benefits to be granted (remission) in the Health Insurance segment.

Compared to the same period last year, the increase in other operating expenses net of other operating income in the first nine months of 2011, in the amount of R\$857 million, is mainly the result of: (i) higher expenses with the recording of operating provisions, especially civil provisions;

and (ii) higher expenses with amortization of intangible assets – acquisition of banking rights.

Summarized Analysis of Adjusted Income

Income Tax and Social Contribution

Income tax and social contribution expenses in the third quarter of 2011 remained virtually stable when compared with the previous quarter.

In the first nine months of 2011, the increase in these expenses over the same period in 2010 is mainly the result of: (i) an increase in taxable income; and (ii) the termination of tax credits resulting from the increase in the social contribution rate from 9% to 15%.

Unrealized Gains

Unrealized gains totaled R\$9,057 million in the third quarter of 2011, a R\$320 million decrease from the previous quarter. This was mainly due to: (i) the depreciation of marked-to-market securities offset by: (a) the drop in the stock market (Ibovespa -16.2%); and mitigated by: (b) the decrease in the interest rates of securities pegged to the IPCA, impacting their market prices; (ii) mark-to-market effect of subordinated debt; and partially offset by: (iii) the appreciation of investments, especially in Cielo and Odontoprev, whose shares appreciated by 7.4% and 6.9% in the quarter, respectively.

Economic Scenario

Throughout the third quarter, there was mounting concern over the global scenario, accompanied by a significant increase in financial market volatility. The eurozone's fiscal problems continued to garner the most attention, and until a definitive and comprehensive solution is found, there is an increasing risk of the problem spreading to the larger economies, such as Italy, or even contaminating the European banking system. Given the widespread belief in a double-dip recession in the U.S. and Europe, comparisons with the end of 2008 have become inevitable, leading to a deterioration in the confidence of the economic agents. In the last few weeks, the scenario has been marked by increasing uncertainty as analyses point to a more intense deceleration of the Chinese economy than previously expected. New problems with the local banking system and the real estate sector have lent support to fears, which we do not share, that China will post quarterly growth of less than 7.5% in some quarters in 2012, triggering a global economic slowdown.

The heightened risk associated with the world economy has had three important consequences: (i) the normalization of monetary policy by the main central banks will most likely be delayed – as already indicated by the Federal Reserve – thereby ensuring high international liquidity; (ii) the prices of the leading commodities have fallen, albeit less so than in 2008/2009, due to restrictions on supply, especially for agricultural and metal products; and (iii) the increase in risk aversion has benefited the dollar (despite the uncertainties regarding the U.S. economy), leading to a depreciation of other currencies, including those of the developing countries with the best growth prospects.

Brazil is not immune to global events, although it is certainly much better prepared to face the materialization of existing risks than it was three years ago. Faced with a deteriorating international scenario and the current leveling-off of domestic

activity, the Central Bank reduced basic interest rates at the end of August, signaling the beginning of a monetary expansion. At the same time, the country's foreign reserves (currently US\$350 billion, versus US\$208 billion in September 2008) and the volume of reserve requirements held by the Central Bank (R\$421 billion, versus R\$272 billion three years ago) constitute an excellent line of defense that can be tapped into quickly if needed.

Although the prospective global scenario should have a deflationary impact on the Brazilian economy, there are still a number of challenges related to the handling of monetary policy, given the mismatch between supply and demand, the economy's high level of indexation and, most recently, the depreciation of the real to a greater extent than the other "commodity-currencies."

Bradesco is maintaining its positive long-term outlook for Brazil. Despite the country's undeniable export vocation, domestic demand has been and will continue to be the main engine of economic performance. Household consumption has been driven by the buoyant job market, while investments have benefited from the opportunities generated by pre-salt oil exploration and the sporting events in 2014 and 2016. With no signs of excessive income commitment by borrowers and with continuing upward social mobility, the outlook for the Brazilian banking system remains favorable, particularly in the real estate segment, which has ample space for sustainable growth given the economic fundamentals.

The Organization continues to believe that Brazil will achieve a higher potential growth pace more rapidly if fueled by bigger investments in education and infrastructure and by economic reforms that increase the efficiency of the productive sector. Action on these fronts would play a crucial role in giving the private sector a more solid foundation in regard to facing global competition and continuing to grow and create jobs.
