

# CEMIG REPORTS FOR 2Q20

**2Q20 EBITDA: R\$ 1,809 MILLION**  
**ADJUSTED 2Q20 EBITDA: R\$ 941 MILLION**

## Highlights of 2Q20:

- Revenue from supply of electricity lower due to the pandemic:  
down 8.5% YoY for Cemig GT; down 5.6% YoY for Cemig D.
- **Cemig D** distributed 6% less energy in 2Q20 than in 2Q19
  - Captive market: Down 8.0% YoY
  - Transport for clients: Down 3.5% YoY
- **PMSO**: 8.3% lower than in 2Q19 (excluded Programmed Voluntary Retirement Plan)
- Gain from Periodic Tariff Review of Transmission Revenue: R\$ 430 million
- Restatement of asset held for sale (**Light**):
  - Gain of R\$ 475 million = R\$ 314 million, net of taxes

Indicators (GWh)	2Q20	2Q19	%
Electricity sold (excluding CCEE)	12,989	13,120	-1.0%
Total energy carried	4,739	4,910	-3.5%
Indicators – R\$ million	2Q20	2Q19	%
Sales on CCEE	7.1	144.8	-95.1%
Net debt	12,157.2	12,449.9	-2.4%
Net debt (excluding hedge)	8,875.7	11,065.6	-19.8%
Gross revenue	8,621.8	9,973.2	-13.6%
Net revenue	5,934.4	7,016.8	-15.4%
Ebitda (IFRS)	1,809.0	1,811.8	-0.2%
Adjusted Ebitda	941.2	1,061.0	-11.3%
Net profit	1,044.0	2,115.0	-50.6%
Adjusted Ebitda margin	17.10%	19.02%	-1,92p.p.
Ebitda of Cemig D and GT	2Q20	2Q19	%
Ebitda Cemig D	530.7	1,237.1	-57.1%
Ebitda Cemig GT	741.9	299.1	148.0%

## Conference call

### Publication of 2Q20 results

#### Webcast and Conference call

August 17 (Monday), at 2:00 p.m. (Brasília time)

The transmission of results will have simultaneous translation in English and can be seen by Webcast, at

<https://vcasting.voitel.com.br/?transmissionId=8393> (English)

or by conference call on:

## Disclaimer

Certain statements and estimates in this material may represent expectations about future events or results, which are subject to risks and uncertainties that may be known or unknown. There is no guarantee that the events or results will take place as referred to in these expectations.

These expectations are based on the present assumptions and analyses from the point of view of our management, in accordance with their experience and other factors such as the macroeconomic environment, market conditions in the electricity sector, and expected future results, many of which are not under Cemig's control.

Important factors that could lead to significant differences between actual results and the projections about future events or results include Cemig's business strategy, Brazilian and international economic conditions, technology, Cemig's financial strategy, changes in the electricity sector, hydrological conditions, conditions in the financial and energy markets, uncertainty on our results from future operations, plans and objectives, and other factors. Due to these and other factors, Cemig's results may differ significantly from those indicated in or implied by such statements.

The information and opinions herein should not be understood as a recommendation to potential investors, and no investment decision should be based on the veracity, currentness or completeness of this information or these opinions. The information and opinions herein should not be understood as a recommendation to potential investors, and no investment decision should be based on the veracity, currentness or completeness of this information or these opinions.

To evaluate the risks and uncertainties as they relate to Cemig, and to obtain additional information about factors that could give rise to different results from those estimated by Cemig, please consult the section on *Risk Factors* included in the *Reference Form* filed with the Brazilian Securities Commission (CVM) – and in the *20-F Form* filed with the U.S. Securities and Exchange Commission (SEC).

## Our shares

Security	Ticker	Currency	Jun. 2020	Dec. 2019	Change in the period %
Cemig PN	CMIG4	R\$	11.02	13.79	-20.09%
Cemig ON	CMIG3	R\$	11.89	15.59	-23.73%
ADR PN	CIG	US\$	2.05	3.34	-38.62%
ADR ON	CIG.C	US\$	2.21	3.90	-43.33%
Ibovespa	IBOV	–	95,056	115,645	-17.80%
Power industry index	IEEX	–	70,160	76,627	-8.44%

Source: *Econômática* – Adjusted for corporate action, including dividends.

Trading volume in Cemig's preferred shares (CMIG4) in 2020 was R\$ 17.2 billion, of which R\$ 8.25 billion was traded in the second quarter, corresponding to a daily average of R\$ 139.88 million – 8.66% higher than in 2Q19. Trading volume in Cemig's common shares in 1H20 was R\$ 2.91bn, with average daily trading volume of R\$ 23.66mn in 1H20 and R\$ 21.61mn in the second quarter. Cemig's shares, by volume (aggregate of common (ON) and preferred (PN) shares), were the third most liquid in Brazil's electricity sector in the period, and among the most traded in the whole Brazilian equity market.

On the New York Stock Exchange the volume traded in ADRs for Cemig's preferred shares (CIG) in 1H20 was US\$1.34 billion. We see this as reflecting recognition by the investor market of Cemig as a global investment option.

The Bovespa index, benchmark for the São Paulo stock exchange, fell strongly, by 17.80%, in 1H20, as a result of the Covid-19 pandemic, despite the 30.18% in 2Q20. Cemig's preferred shares fell by a similar percentage, 20.09%; and the common shares fell 23.73%. In the 2Q20, CMIG4 rose 23.68% and CMIG3 31.68%. In New York the ADRs for Cemig's preferred shares were down 38.62% in the half-year and up 20.59% in the 2Q20, and the ADRs for the common shares rose 22.78% in Q2, and were down 43.33% – these figures reflect the strong change in the USD/BRL exchange rate in the year.

## 2Q20 RESULTS

*In thousands of Reais, unless otherwise stated*

For second quarter 2020 (**2Q20**), Cemig reports net profit of R\$ 1,043,994, which compares to net profit of R\$ 2,113,986 in 2Q19.

Leading factors in the 2Q20 result:

- Gain on the Periodic Tariff Review of **Cemig GT**: R\$ 429,840.
- Heavy impact of the Covid-19 epidemic on the volume of electricity distributed in 2Q20: down 6% YoY. This effect reached approximately –10.5% in April 2020, and has been showing signs of recovery: load in June and July has been close to that of 2019. Another effect of the pandemic was that the allowance for doubtful receivables in Cemig D was R\$ 57,295 higher than in 2Q19. The amount provisioned in 2Q20 was R\$ 102,504.
- The result of Cemig GT was affected by sale of energy at the lower limit of contractual flexibility ranges for a relevant part of the clients, due to the pandemic.
- **Cemig GT** posted a gain of R\$ 70,770 in Financial revenues (expenses), related to the debt in Eurobonds and the related hedge instrument. In 2Q19, the combined effect of the debt and the hedge on Financial Revenue (expenses) was R\$ 557,833 positive.
- Reversal of part of the impairment of **Light** posted in 1Q20, with recognition of the market value of the investment at June 30, generating a gain in 2Q20 of R\$ 475,137, which net of taxes is R\$ 313,590.
- Continuing reduction of costs of PMSO (Personnel, materials, services and other expenses), which were 8.3% lower YoY – after exclusion of the expenses of R\$ 58,850 on the PDVP voluntary retirement plan, posted in 2Q20.
- **Cemig D** recorded a revenue from transactions under the Surplus Sales Mechanism (MVE) totaled R\$ 41,514 in 2Q20.

- In 2Q19, an impairment of R\$ 688,031 was recognized of Accounts receivable from **Renova**; the amount of impairment posted in 2Q20 was R\$ 37,361.
- In 2Q19, was recorded a revenue of R\$1,438,563 from Tax credits in ICMS/PIS-Cofins case and financial revenue of R\$1,553,112 for updating of these credits.

## The 'Covid Account'

On May 18, 2020, in response to the state of public calamity caused by the Covid 19 pandemic, Decree 10350/2020 authorized creation of the 'Covid Account', the purpose of which was to cover deficits, or anticipate revenue, of holders of concessions or permissions to distribute electricity – the basis of the financial flows of the electricity sector, especially related to: (i) overcontracting of supply; (ii) the CVA ('Portion A' Variation Compensation Account); (iii) neutrality of sector charges; (iv) postponement until June 30, 2020 of the results of tariff review processes for distributors ratified up to that date; and (v) bringing forward of the regulatory asset relating to Portion B, as per an Aneel regulation and timetable decided by the distributor.

On June 23, 2020 Aneel issued Normative Resolution 885/2020, setting the criteria and procedures for management of the Covid Account, and also regulating use of the CDE tariff charge. Under this Resolution, the amounts transferred to each distributor are reverted as negative financial components up to the tariff adjustment processes of 2022, duly updated by the Selic rate, with neutrality assured.

Cemig D accepted the financial offsetting mechanism of the Covid Account, with a view to strengthening its cash position, enabling compliance with its financial obligations even during the reduction of revenue caused by the severe economic downturn. On July 9, 2020, Aneel informed Cemig D of the amount from the Covid Account to be allocated to it – a total of R\$ 1,404,175, to be passed through in stages. The first tranche, of R\$ 1,186,390, was received on July 31, 2020, with the remaining total of R\$ 217,785 to be received in six monthly payments in August 2020 through January 2021.

### Measures to preserve liquidity

In addition to accepting the terms of the Covid Account, to preserve liquidity and mitigate the effects of the impact on the macro economy, the Company took measures including the following:

- Revision of its program of investments and expenses.
- Payment of minimum dividends to stockholders, and postponement of the payments of dividends and Interest on Equity to the end of 2020.
- Negotiation of its contracts with Free Clients.
- Deferral of payment of employment-law taxes and charges, as authorized by legislation.

## Cemig's consolidated electricity market

The **Cemig Group** makes its sales of electricity through its distribution company, Cemig Distribuição ('Cemig D'), its generation and transmission company, Cemig Geração e Transmissão ('Cemig GT'), and other wholly-owned subsidiaries:

Horizontes Energia, Sá Carvalho, Cemig PCH, Rosal Energia, the wind power companies Praias de Parajuru and Volta do Rio, Cemig Geração Camargos, Cemig Geração Itutinga, Cemig Geração Salto Grande, Cemig Geração Três Marias, Cemig Geração Leste, Cemig Geração Oeste, and Cemig Geração Sul.

These companies sell electricity to:

- (i) Captive consumers in Cemig's concession area in the State of Minas Gerais;
- (ii) Free Consumers in both the State of Minas Gerais and other States of Brazil, in the Free Market (*Ambiente de Contratação Livre*, or ACL);
- (iii) other agents of the electricity sector – traders, generators and independent power producers, also in the ACL; and
- (iv) Distributors, in the Regulated Market (*Ambiente de Contratação Regulada*, or ACR).

The Cemig group traded a total of 12,988,626 MWh on the CCEE in 2Q20, 1.0% less than in 2Q19. Sales of electricity to final consumers, plus Cemig's own consumption, totaled

9,587,085 MWh, or 10.4% less than in 2Q19. Sales to distributors, traders, other generating companies and independent power producers in 2Q20 were 3,401,541 MWh – or 40.4% more than in 2Q19.

In June 2020 the Cemig Group invoiced 8,590,483 clients – this was 1.5% more than its number of consumers in June 2019. Of this total number of consumers, 8,590,104 are final consumers, and/or represent Cemig’s own consumption; and 379 are other agents in the Brazilian electricity sector.

This chart shows the percentage of the Cemig Group’s sales to final consumers:

**Sales to final consumers as % of total**

**Total consumption of electricity (GWh) – Down 1.0% YoY**

## The electricity market of Cemig D

Electricity billed to captive clients and electricity transported for Free Clients and distributors with access to Cemig D's networks in 2Q20 totaled 10,526,441 MWh, or 6.0% less than in 2Q19. This result is a composition of: (i) lower use of the network by Free Clients – a YoY decrease of 3.5%; and (ii) consumption by the captive market 8.0% lower YoY.

### Captive clients + Transmission service (MWh)

Captive clients + Transmission service (MWh)	2Q20	2Q19	%
Residential	2,657,910	2,547,878	4.32
Industrial	4,782,233	5,112,557	-6.46
Commercial, Services and Others	1,275,441	1,622,920	-21.41
Rural	900,984	917,775	-1.83
Public authorities	169,008	231,943	-27.13
Public lighting	325,162	333,969	-2.64
Public services	339,650	339,955	-0.09
Concession holders (Distributors)	68,082	84,060	-19.01
Own consumption	7,970	7,247	9.98
<b>Total</b>	<b>10,526,441</b>	<b>11,198,304</b>	<b>-6.00</b>

### Residential

Residential consumption, which was 25.2% of the energy distributed by **Cemig D** in 2Q20, was 4.3% higher than in 2Q19. This increase reflects a total of 122,382 new consumer units being added to the network since the end of June 2019, and also average monthly consumption per consumer approximately 2.5% higher than in 2Q19.

### Industrial

Consumption by the *industrial* consumer category was 45.4% of the total volume of electricity distributed by **Cemig D**, and totaled 4,782,233 MWh in 2Q20, or 6.5% less than in 2Q19. Consumption suffered a strong impact from the pandemic: the heaviest reductions were in the automotive, textiles and steel sectors.

Energy consumed by captive clients totaled 406,876 MWh in 2Q20, 34.5% less than in 2Q19. The volume of energy transported for industrial Free Clients was 41.6% of the total of energy distributed, and was 4,375,358 MWh in 2Q20, 2.6% less than in 2Q19.

## Commercial and Services

Distribution to this category of client was also strongly impacted by the pandemic, and by the restrictions on opening of stores, etc. – it was 21.4% less than in 2Q19. Volume was down 23.4% YoY in the captive market, and down 13.5% YoY in the Free Market. The total energy used by captive clients, plus energy transported for Free Clients, in the category was 12.1% of the total of energy distributed by **Cemig D** in 2Q20.

## Rural

The *rural* consumer category suffered less from the Covid pandemic than other consumer categories. Its total consumption was 1.8% less in 2Q20 than 2Q19, even with a reduction of 13,023 consumer units in the category, due to re-registry of consumers to comply with Aneel Resolution 800.

## Number of clients

A total of 8,589,721 consumers were billed in June 2020, or 123,507 more than in June 2019. Of this total, 1,584 were Free Consumers using the distribution network of Cemig D.

Cemig D	Number of clients		Change, %
	2Q20	2Q19	
Residential	7,002,932	6,880,550	1.78%
Industrial	29,745	29,712	0.11%

(1) Includes Distributed Micro-generation.

(2) Includes own consumption

## The electricity market of Cemig GT

Cemig GT billed a total of 7,233,217 MWh in 2Q20, 5.4% more than in 2Q19. Consumption by industrial clients was 627,536 MWh lower than in 2Q19, while commercial consumption was 1.23% higher – reflecting an increase of approximately 29% in the number of clients.

Sales 51.7% higher in the Free Market mainly reflected the higher volume of sales in the spot market to traders especially in April, and less allocation of energy for settlement on the CCEE.

Cemig GT	(MWh)		Change, %
	2Q20	2Q19	
Free Clients			
<i>Industrial</i>	2,698,768	3,326,304	-18.87%
<i>Commercial</i>	1,095,953	1,082,661	1.23%

Free Market – Free contracts	2,870,210	1,892,134	51.69%
Regulated Market	531,332	530,140	0.22%
ACR – Cemig D	32,363	32,348	0.05%
<b>Total</b>	<b>7,233,217</b>	<b>6,864,111</b>	<b>5.38%</b>

## SUPPLY QUALITY INDICATORS – DECI and FECI

Cemig is continuously taking action to improve operational management, organization of the logistics of its emergency services, and its permanent routine of preventive inspection and maintenance of substations, distribution lines and networks. It also invests in training of its staff for improved qualifications, state-of-the-art technologies, and standardization of work processes, aiming to maintain the quality of electricity supply, and as a result maintain satisfaction of clients and consumers.

The charts below show Cemig’s indicators for duration and frequency of outages – DECI (Average Outage Duration per Consumer, in hours), and FECI (Average Outage Frequency per Consumer, in number of outages), since January 2016. These quality indicators are linked to the current concession contract of **Cemig D** (distribution), signed in 2015.

Note: Figures for 2016 and 2017 are according to recalculation presented by the Company to Aneel.

## Consolidated operating revenue

### Revenue from supply of electricity (a)

Total revenue from supply of electricity in 2Q20 was R\$ 5,920,014, 6.4% less than in 2Q19 (R\$ 6,327,737).

	MWh (1)			R\$ '000			Average price billed (R\$/MWh)	
	2Q20	2Q19	Change %	2Q20	2Q19	Change %	2Q20	2Q20

### Final consumers

Revenue from energy sold to final consumers totaled R\$ 5,332,353 in 2Q20, or 4.23% less than in 2Q19 (R\$ 5,567,717) – reflecting consumption of electricity 10.40% lower YoY due to the pandemic, partly offset by the effect of **Cemig D's** annual tariff increase in force from May 28, 2019 (full effect in 2020), which had an average impact on consumers' tariffs of 8.73%.

### Revenue from Use of Distribution Systems (the TUSD charge)

In 2Q20 this revenue was R\$ 674,737, or 6.14% more than in 2Q19 (R\$ 635,675). This difference arises mainly from the Company's annual tariff adjustment, in effect from May 28, 2019 (full effect in 2020), which had an average impact of approximately 15.47% for Free Clients; partially offset by volume of energy transported in 3.49% lower in 2Q20 than in 2Q19.

CVA and Other financial components in tariff adjustments

In its financial statements Cemig recognizes the difference between actual non-controllable costs (in which the CDE, and electricity bought for resale, are significant components) and the costs that were used as the basis for decision on the rates charged to consumers. In 2Q20 this item comprised a reduction of revenue by R\$ 136,254, compared with an addition to revenue of R\$ 40,109 in 2Q19. This variation mainly reflects: (1) higher costs of energy from Itaipu, due to the rise in the dollar exchange rate; and (2) the effects of overcontracting resulting from lower consumption of electricity, which generated an increase in the net financial asset to be passed through to the Company by the next tariff adjustment. These effects were partially offset by the passthrough of surplus amounts under the Energy Reserve Account (CONER), established by Aneel Dispatch 986/2020. The Company's CVA balance receivable is R\$ 926,183.

Changes in balances of financial assets and liabilities:

	R\$ '000
<b>Balance at March 31, 2019</b>	<b>1,147,415</b>

Updating – Selic rate	32,140
<b>Balance at June 30, 2019</b>	<b>1,130,865</b>
<b>Balance at March 31, 2020</b>	<b>775,885</b>
<i>Net constitution of financial assets</i>	<i>262,167</i>
<i>Realized</i>	<i>-125,913</i>
Advances from the Flag Tariff Centralizing Account ('CCRBT')	-1
Updating – Selic rate	14,045
<b>Balance at June 30, 2020</b>	<b>926,183</b>

### Transmission concession revenue

This revenue in 2Q20 was R\$ 299,832, or 138.79% more than in 2Q19 (R\$ 125,564). The higher figure is mainly due to the remeasurement of the Remuneration Base in the Periodic Tariff Review of Permitted Annual Revenue (RAP), ratified by Aneel on June 30, 2020, resulting in an adjustment of R\$ 198,714. Additionally, these revenues were impacted by the increase in annual RAP, in July 2019 – this includes the effects of inflation and also new revenues resulting from investments authorized. The percentages and indices applied are different for different concessions: the IPCA inflation index is applied to the contract of Cemig GT, and the IGP-M index to the contract of Cemig Itajubá. They also include an adjustment to expectation of cash flow from financial assets, due to the change in the fair value of the Regulatory Remuneration Base of Assets (BRR).

### Transmission reimbursement revenue

The Company records the updating of the balance receivable for the indemnity (reimbursement of asset value) based on the IPCA inflation index, and the average Regulatory cost of capital, as specified in the regulation for the sector.

The transmission indemnity revenue in 2Q20 was 348.33% higher than in 2Q19 – at R\$ 259,680 compared to R\$ 57,921 in 2Q19. This higher figure mainly reflects the upward adjustment to the economic portion of the indemnity base, as a result of the Periodic Review of RAP, which was recalculated in accordance with the applicable regulatory rules, resulting in an increase of R\$ 231,126 in the Company's profit at June 30, 2020.

Additionally, these revenues were influenced by the difference in the IPCA inflation index between the two periods. At the beginning of the tariff cycle, which takes place in July of each year, the amounts received for the adjustment set for the cycle, corresponding to the amortization of the debtor balance up to the end of the period, are excluded from the remuneration base for updating, reducing the remuneration. The indemnity (reimbursement) is being received through the RAP (Permitted Annual Revenue) since 2017, over a period of 8 years, for the financial portion, and for the remaining period of the useful life of the assets, for the economic portion.

### Revenue from transactions on the Wholesale Trading Exchange (CCEE)

Revenue from transactions in electricity on the CCEE in 2Q20 was R\$ 7,074, compared to R\$ 144,821 in 2Q19 – a reduction of 95.1% year-on-year. This reduction is due to the lower availability of electricity for settlement on the CCEE; higher allocation of

electricity to 'bilateral' sales on the spot market in 2Q20, and the lower value of the spot price than in the previous year.

Month	Spot Price			GSF	
	Sub-market	R\$/MWh		2020	2019
		2020	2019		
April	SE/CO	39.68	180.41	1.023	1.189
May	SE/CO	71.95	135.17	0.956	0.923
June	SE/CO	114.79	78.52	0.765	0.669

### Revenue from supply of gas

The Company reports revenue from gas 24.62% lower YoY in 2Q20, at R\$ 403,227, compared to R\$ 534,995 in 2Q19. This difference basically reflects volume of gas sold 17.55% lower, at 183,138m<sup>3</sup> in 2Q20, compared to 222,106m<sup>3</sup> in 2Q19, led by the *industrial* consumer category, which consumed 21.75% less volume year-on-year.

Market ('000 m <sup>3</sup> /day)	2015	2016	2017	2018	2019	1H20	1H19
Residential	1.04	3.38	11.44	17.73	21.28	23.91	19.23
Commercial	22.42	24.68	32.67	39.37	47.7	47.11	41.87
Industrial	2,422.78	2,173.76	2,453.22	2,400.41	2,085.32	1,902.09	2,219.07

<b>Total, excluding thermal generation</b>	<b>2,566.11</b>	<b>2,322.01</b>	<b>2,623.47</b>	<b>2,612.65</b>	<b>2,302.74</b>	<b>2,088.50</b>	<b>2,434.50</b>
Thermoelectric power	1,309.13	591.52	990.89	414.04	793.94	292.13	534.27
<b>Total</b>	<b>3,875.24</b>	<b>2,913.53</b>	<b>3,614.36</b>	<b>3,026.69</b>	<b>3,096.69</b>	<b>2,380.63</b>	<b>2,968.77</b>

Supply of gas to the residential market began in 2013. In June 2020, a total of 54,552 households were supplied and billed.

Number of clients	2015	2016	2017	2018	2019	June 2020
Residential	3,820	14,935	30,605	41,377	50,813	54,552
Commercial	218	394	591	756	981	978
Industrial	113	112	107	109	109	98
Other	62	49	50	57	61	62
Thermoelectric power	2	2	2	2	2	2
<b>Total</b>	<b>4,215</b>	<b>15,492</b>	<b>31,355</b>	<b>42,301</b>	<b>51,966</b>	<b>55,692</b>

## Taxes and charges reported as Deductions from revenue

The total of these taxes and charges reported as deductions from revenue in 2Q20 was R\$ 2,687,389, or 9.10% less than in 2Q19 (R\$ 2,956,432).

### The Energy Development Account – CDE

The amounts of payments to the Energy Development Account (CDE) are decided by an Aneel Resolution. The purpose of the CDE is to cover costs of concession indemnities (reimbursements of costs of assets), tariff subsidies, the subsidy for balanced tariff reduction, the low-income-consumer subsidy, the coal consumption subsidy, and the Fuels Consumption Account (CCC). The charges for contribution to the CDE were R\$ 608,155 in 2Q20, compared to R\$ 679,017 in 2Q19, or 10.44% lower, mainly due to the termination of the Regulated Market Account ('the ACR Account'), in August 2019.

This is a non-manageable cost: the difference between the amounts used as a reference for setting of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

### Consumer charges – the 'Flag' Tariff system

The 'Flag' Tariff bands are activated as a result of low levels of water in the system's reservoirs – tariffs are temporarily increased due to scarcity of rain.

Charges to the consumer arising from the 'Flag Tariff' system in 2Q20 were 99.16% lower year-on-year – at R\$ 73 in 2Q20, vs. R\$ 8,712 in 2Q19. This reflects the flag being 'green' during the whole of 2Q20. For comparison, in 2Q19 the yellow flag was activated in May (with effect on the billing for June 2019).

The 'Flag' Tariff component – history			
<b>Mar. 2020</b>	Green	<b>Mar. 2019</b>	Green
<b>Apr. 2020</b>	Green	<b>Apr. 2019</b>	Green
<b>May 2020</b>	Green	<b>May 2019</b>	Yellow
<b>Jun. 2020</b>	Green	<b>Jun. 2019</b>	Green

## Operating costs and expenses

Operational costs and expenses in 2Q20 were R\$ 4,928,788, or 10.22% less than in 2Q19 (R\$ 5,489,685).

The following paragraphs comment on the main variations in expenses:

### Personnel

The expense on personnel in 2Q20 was R\$ 339,183, or 8.70% more than in 2Q19 (R\$ 312,031). The difference mainly reflects recognition in 2Q20 of R\$ 58,850, the cost of voluntary severance programs; and also the effect of the salary increase of 2.55% agreed in November 2019 under the Collective Work Agreement. Excluding the effects of the voluntary severance program, spending on personnel would have been 10.16% lower than in 2Q19.

PDVP	Cost, R\$ '000	Number of employees accepting
<b>Consolidated</b>	<b>58,850</b>	<b>396</b>
GT	11,348	61
D	45,584	329

## Number of employees – by company

## Employees' and managers' profit shares

The expense on employees' and managers' profit shares in 2Q20 was R\$ 7,440, compared to R\$ 108,478 in 2Q19, reflecting the lower profit in the period and the change in the criteria for shared profit sharing.

## Electricity purchased for resale

The expense on electricity bought for resale in 2Q20 was R\$ 2,755,238, or 9.07% more than in 2Q19 (R\$ 2,526,019). This arises mainly from the following factors:

- Expenses on supply from Itaipu 45.31% higher, at R\$ 524,601 in 2Q20, than in 2Q19 (R\$ 361,021). The difference mainly reflects the higher average US dollar exchange rate – R\$ 5.40 in 2Q20, compared to R\$ 3.92 in 2Q19; and the higher price of energy in US dollars, at R\$ 28.41/kW for the whole of 2020, compared with US\$ 27.71/kW for 2019.
- Expenses on supply acquired at auction were 9.31% higher YoY in 2Q20, at R\$ 748,514, compared to R\$ 684,774 in 2Q19. This increase reflects: (i) volume of energy acquired approximately 10% higher year-on-year; and (ii) the upward adjustment in power purchasing agreements on the regulated market (CCEARs) taking place at the moment of **Cemig D's** tariff adjustment.

- Higher expenses on distributed generation: R\$ 154,315 in 2Q20, compared to R\$ 44,892 in 2Q19. This higher figure reflects the increase in the number of generating facilities installed, and the higher quantity of energy injected into the network (232,076 MWh in 2Q20, compare to 95,965 MWh in 2Q19).

For **Cemig D**, purchased energy is a non-manageable cost: the difference between the amounts used as a reference for calculation of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

Consolidated	2Q20	2Q19	Change
Supply from <i>Itaipu Binacional</i>	524,601	361,021	45.31%

Proinfa	77,933	95,308	-18.23%
Distributed generation	154,314	44,892	243.74%
Credits of PIS, Pasep and Cofins taxes	-166,429	-154,239	7.90%
	<b>1,903,100</b>	<b>1,627,426</b>	<b>16.94%</b>

### Gas bought for resale

The expense on acquisition of gas was 29.92% lower in 2Q20, at R\$ 231,378, compared to R\$ 330,180 in 2Q19. This basically reflects volume of gas purchased 14.61% lower, at 185,852m<sup>3</sup> in 2Q20, compared to 217,646m<sup>3</sup> in 2Q19.

### Post-retirement obligations

The impact on operational profit of the Company's post-retirement obligation was an expense of R\$ 118,322 in 2Q20, compared to an expense of R\$ 97,790 in 2Q19. This is mainly the result of reduction in the discount rate used in the actuarial calculation – which increased the amount of the actuarial liabilities, and consequently the scale of the expense reported.

### Charges for use of the transmission network

Charges for use of the national grid in 2Q20 were R\$ 257,441, or 29.92% less than in 2Q19 (R\$ 367,375).

This is a non-manageable cost in the distribution activity: the difference between the amounts used as a reference for calculation of tariffs and the costs actually incurred is compensated for in the subsequent tariff adjustment.

### Operating provisions

Operational provisions in 2Q20 totaled R\$ 197,613, or 77.27% less than in 2Q19 (R\$ 869,373). This arises mainly from the following factors:

- Recognition in 2Q19 of a higher provision for impairment of Accounts receivable from Renova: R\$ 688,031, compared to R\$ 37,361 in 2Q20.
- Losses expected on doubtful receivables from clients 142.22% higher, at R\$ 115,360 in 2Q20, compared to R\$ 47,627 in 2Q19. This difference mainly reflects higher default by clients in the *public authorities* category, and, especially, worsening of performance in the *residential* and *industrial* consumer categories, due to the pandemic.

- Lower provisions made for employment-law contingencies: R\$ 23,375 in 2Q20, compared to R\$ 105,122 in 2Q19. This mainly reflects recognition, in 2Q19, of a change in the indexor used for monetary updating of employment-law actions, from the TR reference rate to the IPCA-E inflation rate, for claims between March 25, 2015 and November 10, 2017 – which are at an advanced phase of execution. The chances of loss have been assessed as ‘probable’.

## Share of profit (loss) in associates and joint ventures

The Company reported a gain of R\$ 82,534 as share of net profit in associates and joint ventures, which was 127.5% more than in 2Q19. This mainly reflects improvement in the result of **Taes**a and a less negative result from the stake in **Santo Antônio** that was negative R\$ 18,528 in 2Q20 and negative R\$ 58,154 in 2Q19.

Note: The result of Companhia de Transmissão **Centroeste** de Minas is no longer included in this account (equity income), since the conclusion of purchase by the Company of the remaining stake in Centroeste in January 2020.

Share of profit (loss) in affiliates and joint ventures	2Q20	2Q19
Taes	90,404	64,858
Aliança Geração	24,939	23,276
Baguari Energia	5,539	5,138

<b>Total</b>	<b>82,534</b>	<b>36,274</b>

## Financial revenue and expenses

For 2Q20, Cemig reports net financial expenses of R\$ 35,317, which compares to net financial revenue in 2Q19 of R\$ 1,908,587. This reflects two main factors:

- Appreciation of the dollar in 2Q20 by 5.33%, compared to a depreciation of 1.66% in 2Q19, resulting in FX variation expenses on the principal debt in Eurobonds of R\$ 415,950 in 2020, compared to revenues in 2Q19, of R\$ 96,750.
- In 2Q20 the fair value of the hedge instrument increased by R\$ 486,720, offsetting the effect of FX variation on the principal of the debt in Eurobonds – with a combined positive result of R\$ 70,770. In 2Q19 the variation in the fair value of the hedge instrument was R\$ 461,083 which added to the positive effect of FX variation, of R\$ 96,750, generated a combined gain of R\$ 557,833. The increase in the fair value of the hedge instrument in 2Q20 arises, especially, from lowering of the DI curve (short leg), which reduced the expectation of the obligation to pay interest; and appreciation of dollar futures, which resulted in an increase in the value of the call spread options.

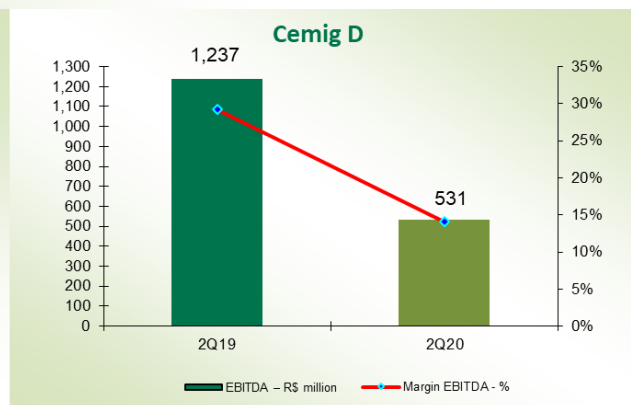

Period	2Q20	2Q19
Effect on the hedge	486,720	461,083
Effect on the principal of the Eurobond debt	-415,950	96,750
<b>Total effect on Financial revenue (expenses)</b>	<b>70,770</b>	<b>557,833</b>

- Recognition of financial revenue in 2Q19 from monetary updating of the R\$ 1,553,112 credits for PIS, Pasep and Cofins taxes.

## EBITDA

Cemig's consolidated Ebitda in 2Q20 was 0.2% lower than in 2Q19; adjusted Ebitda was 11.3% lower. Ebitda margin in 2Q20 was 32.86% – compared to 25.82% in 2Q19 – but adjusted 2Q20 Ebitda margin was 17.10% compared to 19.02% in 2Q19.

EBITDA – R\$ '000	2Q20	2Q19	Change, %
Net profit for the period	1,043,994	2,114,986	-50.6%
+ Income and Social Contribution taxes	483,986	1,356,983	-64.3%
+ Net financial revenue (expenses)	35,317	-1,908,587	-101.9%
+ Amortization and Depreciation	245,697	248,403	-1.1%
<b>EBITDA</b>	<b>1,808,994</b>	<b>1,811,785</b>	<b>-0.2%</b>
<b>Non-recurring and non-cash effects</b>			
+ Net profit attributed to non-controlling stockholders	-188	-212	-11.3%
+ Pis/Pasep e Cofins sobre ICMS	-	-1,438,563	-
+ Write-down for Renova credit risk	37,361	688,031	-94.6%
+ Reversal of Impairment of assets held for sale (Light)	-475,137	-	-
+ Gain from Periodic Tariff Review of Transmission	-429,840	-	-
<b>Adjusted EBITDA</b>	<b>941,190</b>	<b>1,061,041</b>	<b>-11.3%</b>

## DEBT

The Company's total consolidated debt on June 30, 2020 was R\$ 15,862,429, or R\$ 1,086,398 higher than at the end of 2019 (R\$ 14,776,031). It is important to note that the Company also records a net positive balance on hedge transactions for the Eurobond issue, in the total amount of R\$ 3,281,491: R\$ 1,583,727 for the principal of the debt, and R\$ 1,697,764 for the interest. The total net asset value of the hedge is R\$ 1,590,547 greater than at the end of 2019.

In the first half of 2020, debt totaling R\$ 1,042,496 was amortized: R\$ 488,920 in **Cemig GT**, and R\$ 536,867 in **Cemig D**. No new loans were raised in the period. The rise in gross debt was due to appreciation of the dollar in the half-year, which increased the principal of the Eurobonds debt by R\$ 2.17 billion.

### Amortization of debt (R\$ mn)

<b>CEMIG H</b>	<b>Jun. 30, 2020</b>	<b>2019</b>	<b>Change %</b>

## Sources and uses of power – billed market

### SOURCES AND USES OF ELECTRICITY – 1H20 CEMIG GROUP (Wholly-owned companies)

Figures for sources and uses of electricity for the companies of the Cemig Group that are wholly-owned subsidiaries of Cemig: Cemig D, Cemig GT, Cemig PCH, Horizontes, Rosal, Sá Carvalho and SPCs. Excludes inter-company transactions.

- Electricity Sale Contracts in the Regulated Environment (*Contratos de Comercialização de Energia no Ambiente Regulado – CCEARs*); and supply acquired at Adjustment Auctions.
- Energy Reallocation Mechanism – MRE.
- Generation injected directly into the network (includes distributed micro generation).
- Alternative power sources incentivization program (Proinfa).
- Bilateral contracts of the companies CEMIG GT, Sá Carvalho, Horizontes, Rosal, Cemig PCH, and SPCs.
- Sales by Cemig GT in the Regulated Market (*Ambiente de Contratação Regulada – ACR*)

### SOURCES AND USES OF ELECTRICITY – 1H20

#### CEMIG D (Distribution)

- Purchases by Cemig D through Regulated Contracts (CCEARs) and at Adjustment Auction.
- Alternative power sources incentivization program (Proinfa).
- Corunpe* and *Delta* biomass thermal plants; *Caeté* and *Volta Grande* thermal plants; *Porte de Pedra* and *Capim Branco* hydroelectric plants.
- Power purchases not modeled on the CCEE, and other generation inputs (including distributed microgeneration).
- Technical and non-technical losses attributed to the captive market and to power transported in the distribution network.
- Does not include registries in progress with the CCEE (approved but not yet published by CCEE).
- Captive market and regulated power contracts (CCERs).
